## **DETAILED ACTION**

### ***Drawings***

1. The drawings have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the drawings to comply with CFR 1.84(p)(5), e.g. they should include the reference sign(s) mentioned in the specification and vice versa.

### ***Specification***

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Peter-Hoblyn et al (5,968,464).

Peter-Hoblyn et al discloses a NOx removal system comprising:

ammonia jet nozzles 103 disposed on a gas passage 20 of a flue; and ammonia generating means 60 connected to the jet nozzles 103 and disposed within the gas passage 20 of the flue.

Instant claim 1 structurally reads on the apparatus of Peter-Hoblyn et al.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schmelz and Peter-Hoblyn et al (6,361,754) are cited for showing state of the art.
